## PROCESS ENGINEERING

### EAP101: Aspen Plus Process Modeling
Learn steady-state process simulation, process analysis and optimization using Aspen Plus (3 Days, Basic).

**Prerequisites:** None

**Learning Outcomes:**
- Build flowsheet models and summarize basic unit operations.
- Define facilities, materials, utilities and chemical reactions.
- Summarize physical properties.

### EAP121: Building MS Excel User Interfaces
Learn how to embed and link MS Excel using Aspen Plus (1 Day, Basic).

**Prerequisites:** None

**Learning Outcomes:**
- Integrate Aspen Simulation Workbook with add in tools in MS Excel®.
- Use features of the Aspen Simulation Workbook and publish and deploy models.

### EAP150: Rigorous Design and Rating of Distillation Columns (New)
Learn how interactively design and rate distillation columns in Aspen Plus (1 Day, Basic).

**Prerequisites:** None

**Learning Outcomes:**
- Discuss column design and rating.
- Do column designing and perform rating studies of a column.
- Use detailed rate-based modeling to understand and improve column performance.

### EAP2311: Custom Modeler
Learn how to develop equation models with excel using Custom Modeler (3 Days, Basic).

**Prerequisites:** None

**Learning Outcomes:**
- Summarize Equation Oriented modeling, steady state / dynamic modes, and stream types.
- Build flowsheet and create sub models along with hierarchy blocks.
- Script, automate, and customize models.

### EAP2611: Heat Transfer Modeling Using Aspen Plus

**Prerequisites:** Attended EAP101

**Learning Outcomes:**
- Summarize Heat Exchanger Unit Operations.
- Distinguish between the different types of heat exchangers that can be used in Aspen Plus.
- Perform rigorous heat changer design calculations using Aspen EDR.

### EAP901: Aspen Plus – Dryer Optimization: Minimize Energy Demand of Belt Dryers
Learn how to reduce energy demand using Aspen Plus (0.5 days, Basic).

**Prerequisites:** None

**Learning Outcomes:**
- Model a multi-stage bed dryer.
- Optimize the dryer demand to reduce cost.
EAP902: Aspen Plus – Improving Product Recovery in Distillation Column
Learn how to perform maximum product recovery using Aspen Plus (0.5 days, Basic).
Prerequisites: None
Learning Outcomes:
- Model distillation units and analyze potential process changes.
- Optimize distillation units for maximum product recovery.

EAP201: Aspen Plus: Physical Properties for Process Engineers
Learn how to specify and use physical properties using Aspen Plus (2 Days, Intermediate).
Prerequisites: Attended EAP101
Learning Outcomes:
- Specify and use properties in steady-state and dynamic flowsheet simulations.
- Apply Physical Properties, Henrys Law, and Electrolyte Property Methods.
- Use regression and analyze data.

EAP208: Aspen Plus: Migration to V8
Prerequisites: None
Learning Outcomes:
- Create simulations in the new user interface.
- Use activated economics analysis, activated energy analysis, and activated energy analysis.
- Model solids.

EAP250: Distillation Modeling
Learn how to simulate and evaluate model quality using Aspen Plus (2 Days, Intermediate).
Prerequisites: Attended EAP101
Learning Outcomes:
- Use RadFrac models for rating and design and for reporting features.
- Use column analysis and NQ curves for optimization.
- Use reactive distillation, three-phase distillation, and rate-based distillation.

EAP251: Aspen Rate Distillation
Learn how to create accurate simulations of column separations. (1 Day, Intermediate).
Prerequisites: Attended EAP101
Learning Outcomes:
- Compare the operation of the equilibrium RadFrac model to Aspen Rate Based Distillation.
- Use a Calculator Block to make corrections for tuning parameter adjustments.
- Apply different convergence strategies.

EAP252: Pressure Relief Analysis Using Aspen Plus
Learn how to define overpressure systems using Aspen Plus (1 Day, Intermediate).
Prerequisites: Attended EAP101
Learning Outcomes:
- Define overpressure systems in accordance with API 520, 521, 2000.
- Document the full overpressure analysis.
- Design single or multiple relief valves.
EAP281: Aspen Plus: Process Simulation with Aspen Polymers
Learn how to use Aspen Polymers to model polymerization process (3 Days, Intermediate).
Prerequisites: Attended EAP101
Learning Outcomes:
- Define complete polymer process flowsheet models.
- Estimate polymer properties and perform regression from experimental data.
- Apply engineering studies and plant data fitting.

EAP288: Introduction to Aspen Adsorption
Learn how to build and execute simulations rapidly using Aspen Adsorption (2 Days, Intermediate).
Prerequisites: None
Learning Outcomes:
- Build simple to advanced flowsheets and run simulations.
- Apply cyclic steady state models to flowsheet.
- Use parameter estimation.

EAP289: Aspen Chromatography
Learn how to build and execute simulations rapidly using Aspen Chromatography (2 Days, Intermediate).
Prerequisites: Attended EAP2311
Learning Outcomes:
- Build flowsheets using the batch column and other supporting models.
- Create cyclic processes.
- Create and execute Chromatography.

EAP2121: Process Flowsheet Convergence in Aspen Plus
Learn how to develop robust and efficient models using Aspen Plus (1 Day, Intermediate).
Prerequisites: Attended EAP101
Learning Outcomes:
- Discuss sequential module strategy.
- Create simulations to handle tear stream convergence and specify calculation sequence.
- Summarize calculator blocks.

EAP2211: Modeling Processes with Equation Oriented Method using Aspen Plus
Learn how to configure, manipulate and solve flows in EO solution using Aspen Plus (2 Days, Intermediate).
Prerequisites: Attended EAP101
Learning Outcomes:
- Manipulate a flowsheet and run simulations.
- Heat integrate your process using the Heater / HX Flux combination.
- Use parameter estimation and data reconciliation for model tuning.

EAP2411: Improved Process Operability and Control through Aspen Plus Dynamic Models
Learn how to solve process design and plant operation using Aspen Plus Dynamics (3 Days, Intermediate).
Prerequisites: Attended EAP101
Learning Outcomes:
- Create a flowsheet and run simulations.
- Discuss and create models including: RadFrac, heat exchanger, and reactor models.
- Script, automate, and customize custom models.
### EAP2510: C02 Removal Path Using Aspen Plus
Learn the steps involved in properly modeling C02 removal processes using Aspen Plus (3 Days, Intermediate).
**Prerequisites:** Attended EAP101
**Learning Outcomes:**
- Describe approach for modeling C02 removal using physical solvents.
- Determine property parameters using data regression and property estimation.
- Use electrolyte system modeling.
- Build and tune rate based distillation models, sensitivity analysis, and flowsheets.

### EAP2711: Reaction Analysis and Reactor Design using Aspen Plus
Learn how to model various reactors and analyze results using Aspen Plus (2 Days, Intermediate).
**Prerequisites:** Attended EAP101
**Learning Outcomes:**
- Model reactors.
- Calculate reaction rates.
- Use the Aspen Plus Data Fit tool to estimate and reconcile plant or lab data.

### EAP2911: Solids Modeling Using Aspen Plus
Learn how to model processes containing solids handing equipment using Aspen Plus (2 Days, Intermediate).
**Prerequisites:** Attended EAP101
**Learning Outcomes:**
- Model processes containing solids.
- Determine optimal process conditions for new or existing solids processes.

### EAP2980: Modeling of Processes with Aqueous Ionic Solutions Electrolytes and Salts
Learn how set up simulations for electrolyte systems using Aspen Plus (2 Days, Intermediate).
**Prerequisites:** Attended EAP101
**Learning Outcomes:**
- Summarize electrolyte capabilities in Aspen Plus and types of components present.
- Use appropriate reporting options.
- Use equilibrium based and rate-based distillation modeling along with liquid-liquid equilibrium.

### EAP301: Real Time Modeling and Optimization
Learn how to do real time optimization using the EO strategy in Aspen Plus (4 Days, Advanced).
**Prerequisites:** Attended EAP101
**Learning Outcomes:**
- Manipulate a flowsheet and run simulations.
- Use parameter estimation and data reconciliation for model tuning.
- Optimize to maximize plant profit.

### EPD101: Aspen Batch Process Developer
Learn how to model batch data and interpret results using Aspen Batch Process Developer (2 Days, Basic).
**Prerequisites:** None
**Learning Outcomes:**
- Use route selection and cost analysis in early development stage.
- Define facilities, materials, utilities, and chemical reactions.
- Create production plans and recipe.

| EPD201: Asp | Aspen Batch Modeler                                                           | Learn how to simulate batch distillation processes using Aspen Batch Modeler (2 Days, Intermediate). | None                | - Set up batch distillation for physical properties.  
- Use batch distillation in multiple scenarios.  
- Use reactor data and models for data fitting and modeling batch reactor with fitted kinetics.                                                                                                         |
**EHY106: Optimize from the Wellhead to a Gas Processing Facility with Aspen HYSYS (New)**
Learn how to optimize using Aspen HYSYS Upstream and Aspen HYSYS (1 Day, Basic).
**Prerequisites:** None
**Learning Outcomes:**
- Use the latest features in Aspen HYSYS and Aspen HYSYS Upstream for optimization.

**EHY107: Process Safety with BLOWDOWN Technology and PSV Sizing in Aspen HYSYS (New)**
Learn how various simulator functionalities support the process safety using Aspen HYSYS (1 Day, Basic).
**Prerequisites:** None
**Learning Outcomes:**
- Use PRF Design & Rating.
- Use Blowdown Valve Design & Rating.

**EHY121: Building MS Excel User Interfaces**
Learn how to embed and link MS Excel using Aspen HYSYS (1 Day, Basic).
**Prerequisites:** None
**Learning Outcomes:**
- Integrate Aspen Simulation Workbook with add in tools in MS Excel®.
- Use features of the Aspen Simulation Workbook and publish and deploy models.
- Link models to plant process data.

**EHY150: Refinery Process Modeling using Aspen HYSYS and Aspen HYSYS Petroleum Refining**
Learn how to embed and link MS Excel using Aspen HYSYS (1 Day, Basic).
**Prerequisites:** None
**Learning Outcomes:**
- Use flowsheet models to build models and analyze flowsheet convergence issues.
- Use the following models: Catalytic Reformer, Delayed Cooker, and Visbreaker.
- Use Aspen PIMS for refinery planning and scheduling with Aspen HYSYS.

**EHY2314: Developing Dynamic Unit Operation Extensions for Aspen HYSYS using VB.NET**
Learn VB.NET to implement Dynamic Unit Operation Extension model using Aspen HYSYS (1 Day, Basic).
**Prerequisites:** None
**Learning Outcomes:**
- Describe the fundamentals of creating the base code for Dynamic Unit Operation Extension.
- Use the VB.NET environment and implement Dynamic Unit Operation Extension model.
- Optimize the implemented code.

**EHY2511: Flare Network Design and Rating**
Learn how to reduce capital cost and assure the safety of the plant using Aspen HYSYS (2 Days, Basic).
**Prerequisites:** None
**Learning Outcomes:**
- Identify potential process bottlenecks, and validate the capacity of the flare network.
EHY2611: Heat Transfer Modeling Using Aspen HYSYS – EHY2611
Learn how to integrate Aspen HYSYS with heat exchanger modeling software (1 Day, Basic).
Prerequisites: None
Learning Outcomes:
- Compare the different types of heat exchangers with focus on shell & tube and air cooled.
- Embed a rigorous heat exchanger model using the Activated EDR feature.
- Generate physical properties to use in Aspen Exchanger and Rating programs.

EHY901: Multi-Stage Compressors – Conducting Operational Safety Studies Using Dynamic Analysis
Learn how to use Aspen HYSYS Dynamics to evaluate scenarios software using Aspen HYSYS (0.5 Days, Basic).
Prerequisites: None
Learning Outcomes:
- Evaluate several scenarios to ensure the compressor is protected in an emergency shutdown.

EHY902: Crude Unit Optimization – Debottlenecking Options using Aspen HYSYS
Compare options for increasing crude unit throughput capacity using Aspen HYSYS (0.5 Days, Basic).
Prerequisites: None
Learning Outcomes:
- Evaluate scenarios to reduce costs or improve the likely outcomes.

EHY903: Characterization, Manipulation and Utilization of Petroleum Assays
Learn the modeling techniques for petroleum characterization using Aspen HYSYS (0.5 Days, Basic).
Prerequisites: None
Learning Outcomes:
- Use Petroleum Assay Management tools.

EHY904: PSV – Improve Pressure Relief Analysis Workflow using Aspen HYSYS
Learn how to use HYSYS Dynamics, HYSYS Safety Environment, and Flare System Analyzer (0.5 Days, Basic).
Prerequisites: None
Learning Outcomes:
- Use Dynamics, Safety Environment, and Flare System Analysis to complete the pressure relief analysis.

EHY905: Aspen HYSYS Sulsim – Modeling and Optimizing Sulfur Recovery Process
Learn how to optimize overall Sulfur recovery, and build a tail gas treating section (0.5 Days. Basic).
Prerequisites: None
Learning Outcomes:
- Use Aspen HYSYS and the Sulsim Sulfar Recovery functionality.
- Optimize overall Sulfar recovery.
- Evaluate new process configurations.
### EHY130: Modeling Liquefied Natural Gas Plant Using Aspen HYSYS - Upstream
Learn how to use Aspen HYSYS Upstream for Liquefied Natural Gas plant modeling (2 Days, Intermediate).

**Prerequisites:** Attended EHY101  
**Learning Outcomes:**  
- Build a Sulfur Recovery Unit.  
- Calculate hydrate formation temperatures and pressures.  
- Use the LNG Exchanger operation to simulate multi-pass heat exchangers.

### EHY202: Aspen HYSYS Advanced Process Modeling Topics
Learn how to apply advanced modeling techniques to enhance flowsheets (2 Days, Intermediate).

**Prerequisites:** Attended EHY101  
**Learning Outcomes:**  
- Build a plant model and use LNG Exchanger operation to simulate multi-pass heat exchangers.  
- Simulate vessel depressurization and complex relief scenarios.  
- Define reaction sets and utilize different types of reactor models.

### EHY208: Aspen HYSYS: Migration to V8 Topics – EHY208
Become familiar with version 8 using Aspen HYSYS (1 Day, Intermediate).

**Prerequisites:** Attended EHY101  
**Learning Outcomes:**  
- Discuss improved workflow, plotting capabilities, and new features.  
- Use safety analysis environment.  
- Use Assay Management.

### EHY223: Aspen HYSYS Dynamics: Introduction to Dynamic Modeling
Build dynamic models and discovery shortcuts using Aspen HYSYS Dynamics (3 Days, Intermediate).

**Prerequisites:** Attended EHY121  
**Learning Outcomes:**  
- Create dynamic simulations to model real equipment.  
- Use PID controllers and Strip Charts.  
- Use pipeline modeling options in Aspen HYSYS.

### EHY250: Determine Rapid Depressurization Safety Limits for Design and Rating
Learn how to use the Blowdown Technology to model depressurization (0.5 Days, Intermediate).

**Prerequisites:** Attended EHY101  
**Learning Outcomes:**  
- Discuss the industrial importance of accurate depressurizing simulations.  
- Add BLOWDOWN analysis to an existing Aspen HYSY simulation.  
- Perform design and rating calculations.

### EHY251: Flare Network Design and Rating
Solve Complex problems using Aspen Flare System Analyzer (2 Days, Intermediate).

**Prerequisites:** None  
**Learning Outcomes:**  
- Summarize the capabilities and Aspen Flare System Analyzer.  
- Perform process safety studies.

### EAU901: Energy Management – Optimizing Site Utilities to Save Energy using Aspen Utilities Planner
Learn Energy and Utilities optimization (0.5 Days, Basic).
**Prerequisites:** None
**Learning Outcomes:**
- Use a pre-built model make decisions to optimize tariff evaluation, manage contracts, and plan investments.

### EHX101: Design and Rate Shell and Tube Heat Exchangers
Learn how to integrate Heat Exchangers with Aspen HYSYS or Aspen Plus (2 Days, Basic).
**Prerequisites:** None
**Learning Outcomes:**
- Summarize Shell and Tube Heat Exchanger features, calculation modes and geometry.
- Identify best practices for choosing physical properties for heat exchanger modeling.
- Rigorously rate a variety of heat exchanger types.

### EHX131: Heat Exchanger Mechanical Design using Aspen Shell & Tube Mechanical
Learn optimizing techniques to save design time and cost using Aspen Shell & Tube Mechanical (1 Day, Basic).
**Prerequisites:** None
**Learning Outcomes:**
- Summarize Shell and Tube Mechanical features and capabilities.
- Identify input requirements needed to design a heat exchanger.
- Perform the mechanical calculations, and interpret the results.

### EHX1021: Design and Rate Air Cooled Heat Exchangers
Learn the general considerations of Air Cooled Exchangers (1 Day, Basic).
**Prerequisites:** None
**Learning Outcomes:**
- Summarize Aspen Air Cooled Exchanger features, calculation modes, and capabilities.
- Discuss the characteristics and applicability of tubular crossflow exchangers.
- Practice by using the Aspen Air Cooled Exchanger features and capabilities.

### EHX1031: Design and Simulation of Fired Heaters Using Aspen Fired Heater
Learn the fundamentals of rating and simulating a fired heater (1 Day, Basic).
**Prerequisites:** None
**Learning Outcomes:**
- Summarize Aspen Fired Heater features and capabilities.
- Practice by using the Aspen Fired Heater features and capabilities.

### EHX1041: Introduction to Aspen Plate Fin Exchanger
Learn the fundamentals of simulating a plate fin heat exchanger (1 Day, Basic).
**Prerequisites:** None
**Learning Outcomes:**
- Summarize Aspen Plate Fin Exchanger features and capabilities.
- Practice by using the Aspen Plate Fin Exchanger features and capabilities.
EHX1100: Modeling Heat Exchangers Using the Exchanger Design and Rating Suite
Learn how to integrate Heat Exchangers with Aspen HYSYS or Aspen Plus (3 Days, Basic).
Prerequisites: None
Learning Outcomes:
- Summarize Shell and Tube Heat Exchanger features, calculation modes and geometry.
- Discuss the characteristics and applicability of tubular crossflow exchangers.
- Practice by using suite features and functionality: Aspen Air Cooled Exchanger, Plate Fin Exchanger, and Fired Heater.

EHX2911: Improved Energy Efficiency through Heat Integration
Design better and more efficient heat exchanger networks (2 Days, Basic).
Prerequisites: EHY101
Learning Outcomes:
- Summarize Aspen Energy Analyzer features and capabilities.
- Simulate heat exchanger networks.

EHX901: LNG – Designing and Evaluating the Performance of Air Coolers and LNG Heat Exchangers
Learn how to perform design and rating calculations of air-cooled and LNG heat exchanger (0.5 Days, Basic).
Prerequisites: None
Learning Outcomes:
- Use design and rating calculations of air-cooled and LNG heat exchangers.
- Implement parametric studies using Aspen Simulation Workbook.

EHX902: LNG – Refinery Exchangers – Designing and Evaluating the Performance of a Preheat Train
Learn Aspen Exchanger Design & Rating with Aspen HYSYS (0.5 Days, Basic).
Prerequisites: None
Learning Outcomes:
- Overcome the challenges in the design and simulation of CDU heat exchangers.

EHX903: Reboilers – Designing and Troubleshooting Thermosiphon Reboilers
Perform design and rating calculations using Aspen Simulation Workbook (0.5 Days, Basic).
Prerequisites: None
Learning Outcomes:
- Explore the impact of changing operating conditions.
- Use Reboiler Wizard and its ability to simplify more detailed modeling of reboilers in RadFrac models.

EEE901: Develop Comparisons using Aspen Capital Cost Estimator
Learn how to accelerate the decision-making process for evaluating a construction project (0.5 Days, Basic).
Prerequisites: None
Learning Outcomes:
- Improve and accelerate the decision-making process for evaluating the construction methodology for a project.

**APC160: Recipe Management and Process Sequencing**  
Learn how to create recipes and download to InfoPlus.21 (2 Days, Basic).  
**Prerequisites:** None  
**Learning Outcomes:**  
- Create Control Recipe from scratch and existing templates.  
- Administer Aspen Process Recipe System security.  
- Use Production Control Web Server (PCWS).  

**APC170: Intro to Aspen Inferential Qualities**  
Learn how to use Aspen IQmodel to develop linear steady state inferential predictors (3 Days, Intermediate).  
**Prerequisites:** Attended APC101  
**Learning Outcomes:**  
- Develop Aspen IQ models.  
- Use PCWS to interact w/ controller.  

**APC185: Introduction to Nonlinear Controllers Using Aspen Process Controller Builder**  
**Prerequisites:** None  
**Learning Outcomes:**  
- Use Aspen Watch support for plant testing.  
- Simulate a controller using Production Control Web Server (PCWS).  

**APC210: Aspen Watch Performance Monitor – Real Time Monitoring Controllers Online**  
Learn to use Aspen Watch to monitor the performance of DMCplus Controllers (3 Days, Intermediate).  
**Prerequisites:** None  
**Learning Outcomes:**  
- Use Aspen Watch support for plant testing.  
- Evaluate controller performance using Aspen Watch performance monitoring.  

**APC220: APC Best Practices – Adaptive Processes Control**  
Become familiar with Aspen DMC3 for APC maintenance and deployment workflows (0.5 Days, Intermediate).  
**Prerequisites:** None  
**Learning Outcomes:**  
- Run Aspen DMC3 Calibration mode to collect plant step test data.  
- Evaluate controller performance using Aspen Watch performance monitoring.  

**APC221: APC Best Practices – Controller Tuning and Robustness**  
Learn Smart Tune and Robustness features using Aspen DMC3 (0.5 Days, Intermediate).  
**Prerequisites:** None  
**Learning Outcomes:**  
- Run Aspen DMC3 Calibration mode to collect plant step test data.  
- Use Smart Tune to setup pre-defined controller LP strategy.
**APC230: Aspen DMCplus – APC Project Pretesting Using a Virtual Plant**
Learn how to use a virtual plant to execute the pre-testing phase of an APC Project (2 Days, Intermediate).
**Prerequisites:** None
**Learning Outcomes:**
- Discuss APC Project Pretesting.
- Complete an APC pre-testing project.

**APC240: Aspen DMCplus – APC Project Step Testing and Commissioning Using a Virtual Plant**
Configure DMCplus Online, Aspen Watch and APC Web Server software (3 Days, Intermediate).
**Prerequisites:** None
**Learning Outcomes:**
- Conduct preliminary plant testing as you would execute the pre-testing phase of an APC project.
- Collect and Extract Data.

**APC250: Aspen DMC3 – APC Calibrate and Aspen Adaptive Modeling**
Learn the fundamentals of Calibrate mode for APC applications (3 Days, Intermediate)
**Prerequisites:** Attended APC101, APC105 and APC240
**Learning Outcomes:**
- Configure and tune controllers on the APC builder platform.
- Complete adaptive modeling and commission a DMC3 controller.

---

**MANUFACTURING EXECUTION SYSTEMS**

**MES021: Process Analysis Using aspenOne Process Explorer (New)**
Learn how to use analytical tools to identify reasons for performance shortfalls (0.5 Days, Basic).
**Prerequisites:** None
**Learning Outcomes:**
- Incorporate context in analysis to improve problem solving.
- Use ad-hoc events for analyzing continuous processes and performance issues.
- Use assessment tools to monitor production records and equipment performance.

**MES101: Aspen InfoPlus.21 Real Time Information Management Foundation**
Learn how to deploy the Advanced Control Product suite (5 Days, Basic).
**Prerequisites:** None
**Learning Outcomes:**
- Summarize Aspen InfoPlus.21 features and capabilities to effectively monitor critical plant data.
- Implement and configure an Aspen InfoPlus.21 system.
MES121: AspenOne Process Explorer: Using and Configuring
Learn how to use aspenONE Process Explorer interface to trend process data (3 days, Basic).
Prerequisites: None
Learning Outcomes:
- Summarize features and capability of aspenOne Process Explorer.
- Customize trend plots to suit your application.
- Specify plots based on statistical analysis of process data.

MES122: Aspen Process Explorer: Using and Configuring
Learn how to view data from your process using Aspen Process Explorer (1 Day, Basic).
Prerequisites: None
Learning Outcomes:
- Customize trend plots to suit your application.
- Specify plots based on statistical analysis of process data.
- Integrate real-time or historic data from your process into Windows desktop programs.

MES123: Aspen Calc: Using and Configuring
Learn how to use Aspen InfoPlus.21 without programming (1.5 Days, Basic).
Prerequisites: Attended MES122
Learning Outcomes:
- Build simple and complex calculations that use formulas, Excel, and VB Script.
- Create ad-hoc and share calculations.
- Create and view reports.

MES151: Aspen Operations Reconciliation and Accounting (AORA)
Learn how to supervise and maintain an AORA system (3 Days, Basic).
Prerequisites: None
Learning Outcomes:
- Build the AORA model using vessels, pipes, and instruments.
- Import Data and perform AORA database administration.
- Generate reports and automate AORA processes.

MES171: Aspen Production Record Manager: Retrieving Batch Data Using the Reporting Tools
Learn the Reporting tools of Aspen Production Record Manager using Aspen InfoPlus.21 (1 Day, Basic).
Prerequisites: Attended MES122
Learning Outcomes:
- Build simple and complex calculations that use formulas, Excel, and VB Script.
- Create ad-hoc and share calculations.
- Create and view reports.

MES1200: Calculations and Data Analysis for Engineers
Learn how to make decisions based on the process data stored using Aspen InfoPlus.21 (3 Days, Basic).
Prerequisites: Attended MES122
Learning Outcomes:
- Build simple and complex calculations integrated with Aspen InfoPlus.21 without programming.
- Analyze historic data.
- Configure key performance indicator (KPIs) to monitor unit performance and retrieve plant data into Microsoft Excel.

| MES271:       | Aspen Production Record Manager: Configuring the Batch Area and Feed Application                                                              | Learn how to prepare and configure a Batch system (2 Days, Intermediate).                         | Attended MES171        | • Describe the functional design, architecture and main features of Aspen Production Record Manager (APRM).  
• Configure Batch Feed Application.  
• Use Aspen Process Explorer to examine both Ad Hoc and Online Batch Real-time SPC chart. |
| MES275:       | Aspen Batch and Event Extractor: Transferring Data from Batch Execution Systems                                                                 | Learn how to populate tables from your batch execution system (1 Day, Intermediate).            | None                   | • Populate Aspen Production Record Manager tables with data from your batch execution systems.  
• Create, schedule, test, and deploy configuration rules.  
• Monitor execution progress and verify that batches have been created. |
| MES311:       | Aspen InfoPlus.21 Applications Development                                                                                                    | Learn how to tailor Aspen InfoPlus.21 records to fit your process (5 Days, Advanced).            | Attended MES201        | • Summarize how the historian works.  
• Implement advanced features and implement role based security for Aspen InfoPlus.21 and client applications. |
| MES361:       | Aspen Production Execution Manager - Administration                                                                                              | Learn how to use the Production Execution Manager Web Server (2 Days, Advanced).                 | None                   | • Create and assign roles, permissions, workstations, and workstation roles.  
• Use appropriate Aspen Production Execution Manager modules to create and track orders.  
• Use the Production Execution Manager Web Server. |
# PETROLEUM SUPPLY CHAIN

## RPA100: Essential PIMS Concepts and Economic Analysis for Managers & Economists
Learn how to use the report data to perform economic evaluations using Aspen PIMS (4 Days, Basic).

**Prerequisites:** None

**Learning Outcomes:**
- Analyze and interpret information for an executed model and develop Linear Programming structure.
- Perform economic evaluations.
- Use PIMS Assay Management.

## RPA101: Aspen PIMS: Introduction to Refinery Planning
Learn to build refinery planning models in PIMS to generate optimum plans (5 Days, Basic).

**Prerequisites:** None

**Learning Outcomes:**
- Develop Linear Programming (LP) structure.
- Use data tables, case stacking, and product blending required to build and maintain a model.
- Use PIMS Assay Management, PIMS Miscellaneous Tables, and Aspen PIMS Analytics.

## RPA102: Introduction to Aspen PIMS for Petrochemical Planning
Learn to build petrochemical planning models in PIMS to generate optimum plans (3.5 Days, Basic).

**Prerequisites:** None

**Learning Outcomes:**
- Build petrochemical planning models to generate optimum plans.
- Develop Linear Programming (LP) structure.
- Use structures for developing typical petrochemical process units.

## RPA135: Economic Optimization of Distribution Networks using Aspen Petroleum Supply Planner
Learn how to use Aspen MPIMS to solve planning problems using Aspen MPIMS (4 Days, Basic).

**Prerequisites:** None

**Learning Outcomes:**
- Summarize the functionality of Aspen Petroleum Supply Planner and basic Linear Concepts.
- Solve problems using Aspen Petroleum Supply Planner.

## RPA150: Deliver Refinery Planning Results through Industry Best Practices (New)
Learn PIMS / PIMS-AO best practices (1 Day, Basic).

**Prerequisites:** None

**Learning Outcomes:**
- Troubleshoot common modeling mistakes
- Solve problems using PIMS-AO

## RPA153: Aspen Report Writer for Aspen PIMS
Build reports using PIMS, Aspen Petroleum Scheduler and Aspen Multi-Blend Optimizer (1 Day, Basic).

**Prerequisites:** None

**Learning Outcomes:**
- Use the data functions using different data sets.
- Build Report Writer templates to generate reports in Excel format.
### RPA206: Multi-Period Refinery Modeling with Aspen PPIMS
Learn how to build and analyze a multi-period LP models using Aspen PIMS (2 Days, Basic).

**Prerequisites:** None  
**Learning Outcomes:**  
- Explain the differences between non-periodic and periodic models.  
- Transfer inventory from period-to-period.  
- Control blending recipes across multiple periods.

### RPA207: Multiple Plant Planning with Aspen MPIMS Users
Learn how to use Aspen MPIMS to solve planning problems using Aspen MPIMS (2 Days, Basic).

**Prerequisites:** None  
**Learning Outcomes:**  
- Discuss how Aspen MPIMS is used to link multiple single plant Aspen PIMS models.  
- Use various tables to evaluate models and transfer materials into local plants.  
- Summarize global and local reports.

### RPA201: Aspen PIMS: Solving Refinery Planning Problems
Learn how to model and interpret sophisticated plant relationships using Aspen PIMS (5 Days, Intermediate).

**Prerequisites:** Attended RPA101  
**Learning Outcomes:**  
- Implement real-world plant into your Aspen PIMS planning model.  
- Identify & resolve problems that may hinder a planner’s productivity.  
- Perform common economic evaluations.

### RPA208: Aspen PIMS platinum and Assay Manager for Experienced Aspen PIMS Users
Learn how to customize Aspen PIMS Platinum and modify assay data (1 Day, Intermediate).

**Prerequisites:** None  
**Learning Outcomes:**  
- Run a case using Aspen PIMS Platinum Case Runner.  

### RPA221: Aspen PIMS: Advanced Optimization Features
Learn to troubleshoot solutions inherent to non-linear optimization problems (2 Days, Intermediate).

**Prerequisites:** Attended RPA101  
**Learning Outcomes:**  
- Execute different Global Optimization procedures.  
- Set Up and run High Performance Computing architecture.  
- Add and edit non-linear formulas to model.

### RPA301: Aspen PIMS: Advanced Refinery Planning
Learn how to troubleshoot problems and use PIM’s non-linear functionalities (5 Days, Advanced).

**Prerequisites:** Attended RPA201  
**Learning Outcomes:**  
- Model rigorous blending.  
- Use non-linear functionalities.  
- Perform Solution Analysis using Aspen PIMS-Advanced Optimization tool.
Learn how to use Aspen Petroleum Scheduler effectively for daily scheduling operations (2 Days, Basic).
Prerequisites: None
Learning Outcomes:
- Discuss refinery scheduling management issues.
- Build a process flowsheet and simulate a refinery model.
- Integrate products such as Aspen Report Writer, Refinery Report Wizard, and Excel Integration (EIU).

RBS121: Aspen Petroleum Scheduler: Building and Using Models
Learn how to setup processes using Aspen Petroleum Scheduler (5 Days, Basic).
Prerequisites: None
Learning Outcomes:
- Part 1: Use Petroleum Scheduler to build a model and schedule the refinery operations.
- Part 2: Model solutions for both common and unique configuration and schedule logic problems.

RBS131: Aspen Refinery Multi-Blend Optimizer: Blend Planning and Scheduling
Learn how to build a model for seamless scheduling and optimization of daily blend activities (2 Days, Basic).
Prerequisites: None
Learning Outcomes:
- Identify the planning, scheduling and blending integrated work process.
- Configure and build an MBO model with all the necessary components to run the optimizer.

RBS901: Using Aspen Petroleum Scheduler for Crude & Process Unit Scheduling
Learn how to use Aspen Petroleum Scheduler in this hands-on workshop (0.5 Days, Basic).
Prerequisites: None
Learning Outcomes:
- Perform crude and process unit scheduling.
- Import daily inventories and events for the "Roll Forward" process.
- Generate reports using customizable report wizard templates.

SUPPLY CHAIN MANAGEMENT

SCM121: Using Aspen Petroleum Scheduler for Crude & Process Unit Scheduling
Learn how to build or modify a new scheduling model for plants using Aspen Plant Scheduler (3 Days, Basic)
Prerequisites: None
Learning Outcomes:
- Build models that manufactures or packages basic chemicals or polymers.
- Configure an Aspen Plant Scheduler model by following the steps.

SCM201: Introduction to aspenOne Supply Chain Management V8 for Modelers
Learn the new configuration steps using aspenONE Supply Chain Management (Aspen SCM) (4 Days, Basic).
Prerequisites: None
Learning Outcomes:
- Use XML programming.
- Use Trace functionality
- Review best practices to upgrade
### SM905: Building a Planning Model
Learn the new configuration steps using AspenONE Supply Chain Management (Aspen SCM) (3 Days, Basic).

**Prerequisites:** None  
**Learning Outcomes:**  
- Use a business problem through this course to: build and solve an LP model and build reports.  
- Automate model maintenance and execution.  
- Create and execute macros, solve mixed integer programming, and use scenario-based planning.

### SM906: Configuring AspenOne Supply Chain Management Applications
Learn the basics of AspenONE Supply Chain Management (Aspen SCM) (4 Days, Basic).

**Prerequisites:** None  
**Learning Outcomes:**  
- Manipulate data via commands, macros, and rules.  
- Design user interfaces via dialogs, graphs, menus, workspaces and reports.  
- Use application basics such as utility programs, case size management, and security.

### SM908: Configuring the Aspen Demand Manager CAP
Learn the basics of Aspen Demand Manager CAP (3 Days, Basic).

**Prerequisites:** None  
**Learning Outcomes:**  
- Discuss business issues and how demand and supply planning process can solve the issues.  
- Run reports.  
- Configure forecast metrics and collaborate forecasting.

### SCM912: Implementing Aspen Supply Planner
Learn the basics of Aspen Supply Chain Planner (2 Days, Basic).

**Prerequisites:** None  
**Learning Outcomes:**  
- Define time periods and specify correct optimizer.  
- Set up data maintenance, model generation, model optimization, scenario creation, and analysis.  
- Discuss how changes to the LP formulation impact other Supply Planner structures.

### SM913: Using Aspen Supply Planner
Learn how to use Supply Planner efficiently for business planning (2 Days, Basic)

**Prerequisites:** None  
**Learning Outcomes:**  
- Discuss examples of how Aspen Supply Planner can help with planning issues.  
- Generate and publish a plan.  
- Discuss plan analysis including bottleneck analysis and “what if” analysis.

### SM915: Implementing Aspen Collaborative Forecasting
Learn the basics of Aspen Collaborative Forecasting application (2 Days, Basic)

**Prerequisites:** Attended SM908  
**Learning Outcomes:**  
- Discuss business issues and how Collaborate Forecasting can solve the issues.  
- Use the Aspen Collaborative Forecasting Web Based Application.  
- Discuss main stages of implementation and how to manage security along with operation.
### AAA101: Monitor Distillation Column Operation to Predict and Prevent Failures (New)
Learn to predict and prevent column failures using Aspen Column Analytic (1 Day, Basic).

**Prerequisites:** Attended SM908

**Learning Outcomes:**
- Describe RadFrac.
- Model a C2 splitter.
- Use Aspen Asset and Aspen Column Analytics.

### AAA102: Early Failure Detection using Pattern Matching, Root Cause Analysis and Empirical Modeling (New)
Learn how to monitor and optimize asset performance using Aspen Column Analytic (1 Day, Basic).

**Prerequisites:** None

**Learning Outcomes:**
- Identify Data Trends with Aspen Pattern Matching.
- Build a distillation model based on empirical data.

### AFR101: Introduction to Aspen Fidelis Reliability
Learn how to generate predictions of future performance using Aspen Fidelis Reliability (3 Days, Basic).

**Prerequisites:** None

**Learning Outcomes:**
- Discuss the fundamentals of asset management, system engineering, reliability modeling.
- Build simple to medium complexity models.
- Change basic inputs, view results and customize any model for specific requirements.

### AFR150: Maximize Plant Performance using Reliability Analysis (New)
Learn how to generate predictions of future performance using Aspen Fidelis Reliability (3 Days, Basic).

**Prerequisites:** None

**Learning Outcomes:**
- Discuss the fundamentals of making economic cases to drive decisions.
- Identify system limitations.

### APR101: Aspen Mtell Previse: Deploy & Use
Learn how to stop machines from breaking down and to last longer using Aspen Mtell Previse (3 Days, Basic).

**Prerequisites:** None

**Learning Outcomes:**
- Perform conditioning and analysis of time-series sensor data.
- Build and deploy advanced condition monitoring strategies.
- Implement Operator Maintenance Advisory capabilities enabling operators to track open work orders.

### PMV101: Optimize Plant Performance using multivariate data analysis
Learn how to use Aspen ProMV to improve understanding of key process relationships (2 Days, Basic).

**Prerequisites:** None

**Learning Outcomes:**
- Use multi-block modelling to model your process.
- Identify key contributors to poor process performance.
- Optimize process performance.
### PMV121: Optimize Batch Process Performance using multivariate data analysis
Learn how to relate time-varying process data using Aspen ProMV (1 Day, Basic).

**Prerequisites:** None

**Learning Outcomes:**
- Use multi-block modelling to model your batch process.
- Identify key contributors to poor process performance for batch processes.
- Optimize process performance for batch processes.

### LICENSE MANAGEMENT

### SLM101: Aspen Software License Management and Deployment
Learn the installation and configuration process (2 Days, Basic).

**Prerequisites:** None

**Learning Outcomes:**
- Explain the purpose and requirements of Software License Manager.
- Install and configure a license server along with the SLM client tools.

### Aspen Dynamic Optimization

### GDOT101: Fundamentals of Aspen Generic Dynamic Optimization Technology
Learn the fundamentals of GDOT (3 Days, Basic).

**Prerequisites:** None

**Learning Outcomes:**
- Use typical Aspen GDOT applications in petroleum refining and bulk chemicals
- Configure applications using standard templates and connect to OPC server (online)
- Use best practices for implementing Aspen GDOT applications as well as sustaining benefits
